

Assignment - 1

Universal Human Values

Conflict due to Lack of Universal Human Values
during the covid-19 pandemic lockdown in India.

1) What was the situation and what went wrong?

As lockdown was announced suddenly many migrant workers lost jobs. Transport services stopped and people could not return to their villages.

Many walked long distances and faced hunger, exhaustion and lack of medical help.

Root :

There was mistrust between workers and authorities.

Workers feared they would not receive help and

did not fully understand official announcements.

Effects:

- Panic movement
- Disease spread quickly
- People made risky decisions

There were no immediate arrangements for transportation for migrant workers.

Communication between authorities and workers was unclear and employers abandoned workers.

Fear and panic spread quickly.

Different perspectives:

Government perspective:

The aim was to control the spread of a deadly virus and save lives. Lockdown was seen as a necessary policy.

Migrant workers perspective:

They had no food security and feared starvation.

How could the conflict have been handled better?

If Universal Human Values were practiced

the crisis could have been managed more humanely.

Compassion planning:

Transport and food supply could have been arranged.

Respect and dignity:

Care and community facilities

Proper medical and emotional support

No discrimination

Cooperation and trust between governments

would have ensured safe travel and

reduced suffering.
